

Editorial | Family Farming 4.0

Fábio Mosso Moreira^a

Abstract: The editorial comments on the trends of Agriculture 4.0 and highlights how the theme relates to the scenario of small farmers. There is a growing debate in the media, in the market, and in the universities and research bodies, dealing with the possibilities generated by the application of the products and services coming from Agriculture 4.0 for agricultural activities. Therefore, the purpose of this editorial is to demystify some questions and discuss the nuances of these possibilities in a feasible way with the context of the small farmers.

Keywords: Agriculture 4.0. Family Farming 4.0. Small farming. Digital.
